

Shelter

2024 COLLECTION, INSPIRATION BOOK

DUNE

Ŝhelter

THE INSPIRATION

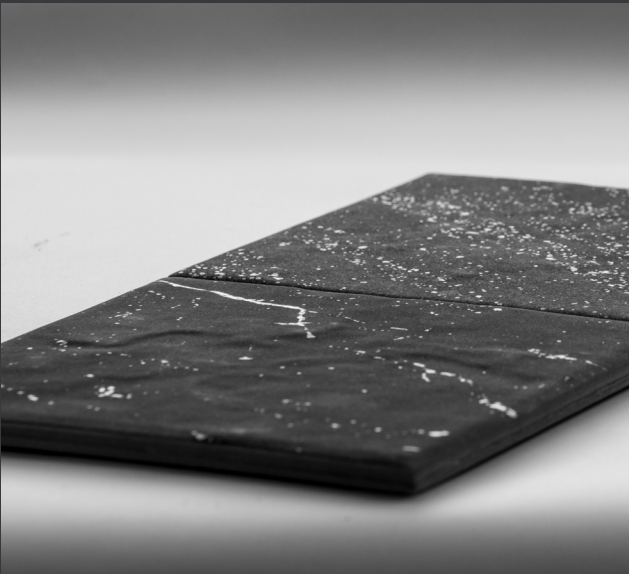

SHELTER is inspired by the fractal shapes of forests and geological structures that invite us to experience the harmony and well-being of nature within our own space. In this way, nature and materiality are the common denominator in the four series that make up the collection. Every detail of the design and every raw material has been meticulously cared for to enhance the realism and sensory richness of the surfaces, whether they are stones or woods.

CONCEPT

Shelter, "refuge" in English, is a tribute to nature and its ability to inspire well-being. A collection of porcelain surfaces designed to evoke the harmony and tranquility that only natural elements can offer.

The strength of SHELTER lies in its three core values:

DESIGN&TECH: the fusion of design and technology that allows for the perfect reproduction of the essence of wood and stone.

MIX&MATCH: The magic of SHELTER lies in its versatility. Although each series has its own unique identity, SHELTER is an invitation to explore creative combinations to enhance both indoor and outdoor spaces, with a special focus on swimming pools.

EXPERIENCES: SHELTER is a global concept where quality and design are not a luxury; they are ceramic surfaces that transform the environment into a refuge of harmony and comfort, creating an experience of well-being and tranquility.

It recalls the nobility of Venetian oak in a slim 22x120 format, offering flexibility and ease of installation, adapting perfectly to any surface. Suitable for both indoor and outdoor use, its special glaze adds Smoothness to its texture, making it a pleasant and safe ceramic surface.

Qercus

Quercus

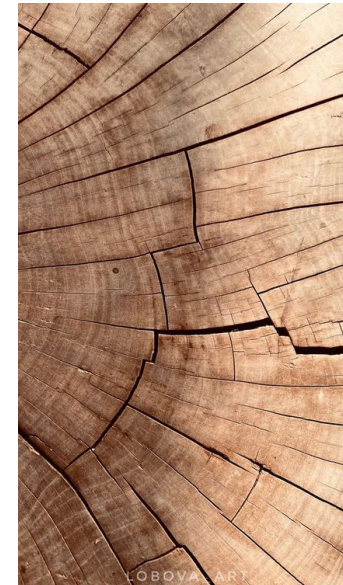

Quercus

THE COLOR PALETTE

Its versatile color palette, ranging from light and whitish tones to aged darks, with warm shades in between, is a cozy and elegant design solution with options for all decor styles.

SCHIAPARELLI SPRING SUMMER 2024

CHLOÉ FALL 2024

Noce

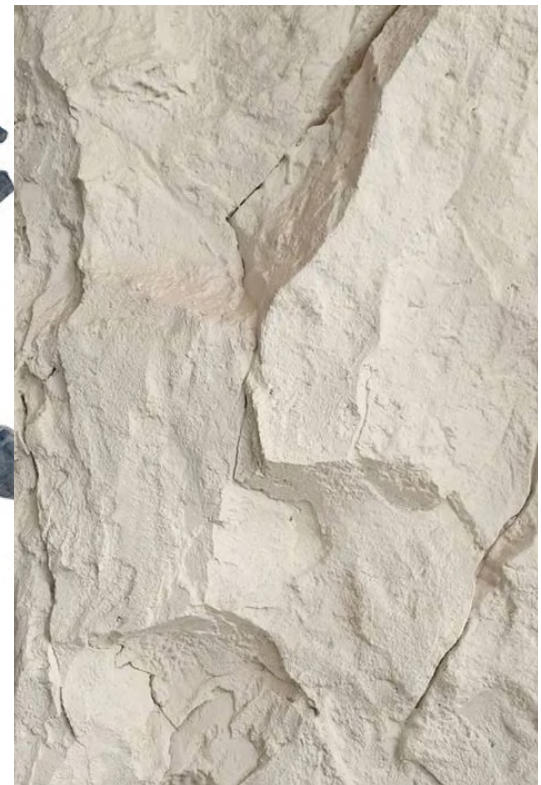

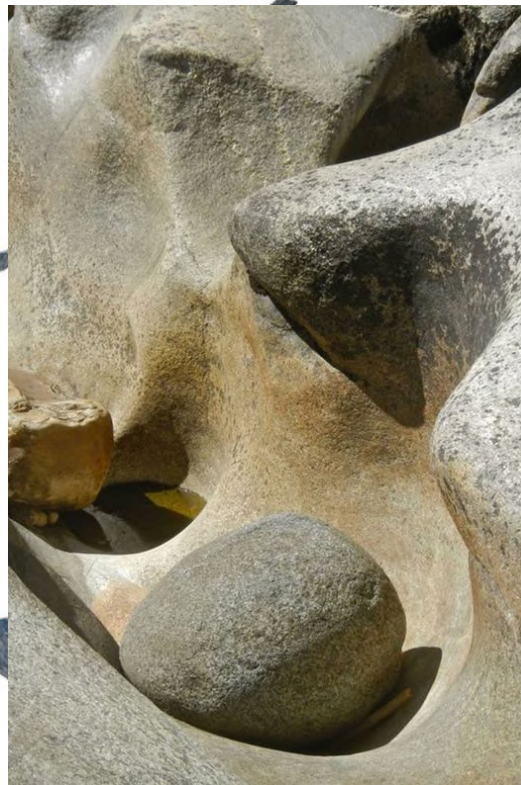

A dramatic landscape photograph of a canyon. In the foreground, a large, light-colored rock formation with distinct horizontal layers (likely sedimentary) juts out from a steep, dark green, tree-covered cliff. The rock face shows some weathering and small patches of green vegetation. In the background, the canyon opens up, revealing more layered rock formations in shades of red, orange, and tan, interspersed with sparse green shrubs and trees. The lighting suggests a bright day, with strong shadows and highlights on the rock surfaces.

Inspired by Italian breccia, famous for its angular rock fragments and mineral remnants, it captures the essence of the unpredictable veining that gives it its name. Available in three sizes and three neutral and complementary colors, Pietra Viva brings an exceptional style and an elegant, timeless character with a touch of Mediterranean beauty.

THE COLOR PALETTE

Bone

Taupe

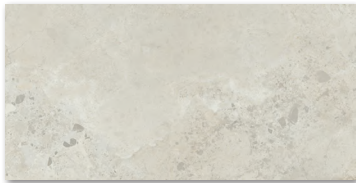

Grey

Two warm shades: Bone and Taupe, and a cooler one, Gray. On a neutral background, the white veining of lime and the colorful mineral inclusions that randomly dot the surface stand out. The three colors can be used alone or combined with each other, given their complementary nature. Additionally, combining this series with Ardesia or Quercus produces incredible results.

Bone

The softer version, in a very neutral bone shade without yellowish undertones, with grayish and mink-colored inclusions. It is the calmest option, ideal for serene environments.

Bone

Taupe

The most genuine version, in a mink tone with warm undertones, adds personality and character to any setting. If a softer look is desired, it can be combined with the Bone shade.

Taupe

Grey

For gray enthusiasts, it is the darkest and least warm of the three versions. Its carefully studied intensity and the bluish and warm hues of the mineral inclusions give it a friendly and welcoming appearance. If we want to brighten the space, it can be combined with the Bone shade.

Grey

Ardesia

A series with a strong personality that faithfully reproduces the relief and rich color palette of slate and quartzite. Available in two colors and a wide range of sizes for indoor and outdoor use, it showcases exceptional texture and material sensitivity. It is ideal for creating sophisticated environments with the beauty of natural stone and the performance of porcelain.

Chiara

It reproduces the shades of quartzite, ranging from off-white to dark gray, with various nuances and intermediate tones in the gray and beige ranges, along with ochre speckles.

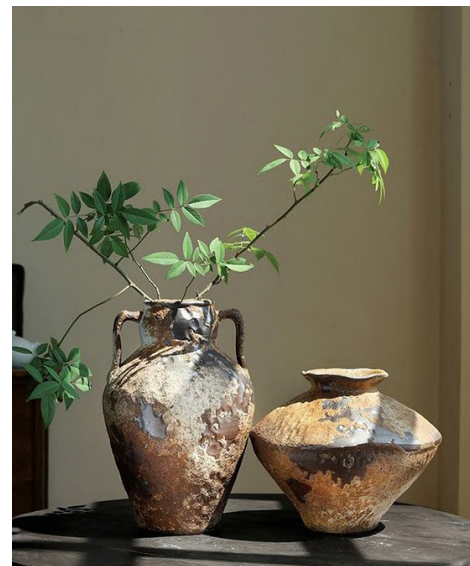

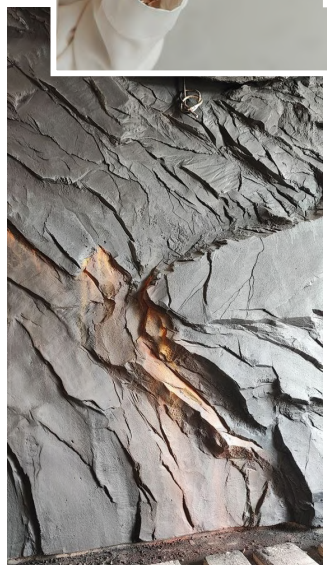

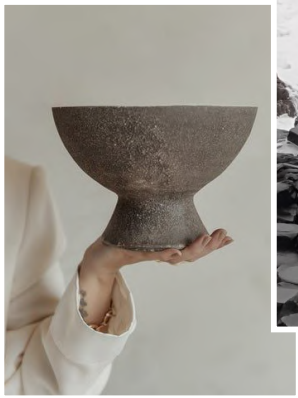

Chiara

Multicolore

Similar to the multicolor slate, this version features a rich, broad, and diverse palette ranging from black to ochre, with intermediate tones in grays, rusty reds, and golds, creating highly dynamic, visually appealing, and welcoming environments.

Multicolore

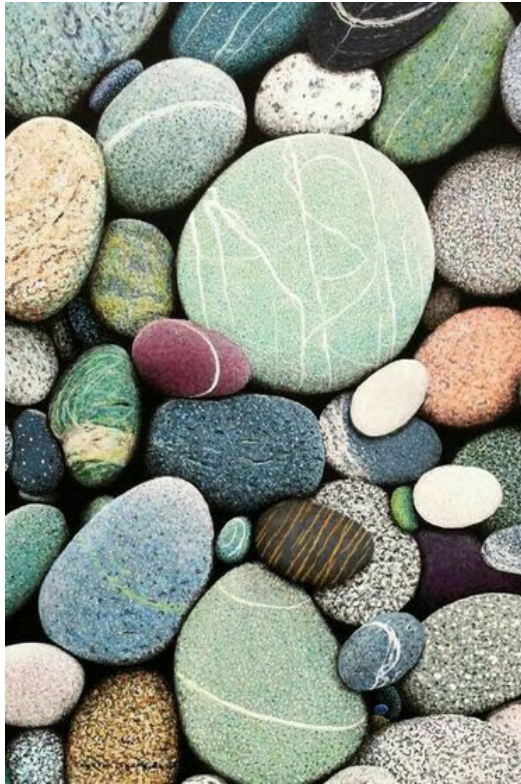

A select collection of small-format porcelain series that encapsulate the beauty of the most exquisite natural stones. Each series, with an immense graphical variety, is a showcase of technical complexity and realism, blending the functionality of ceramics with the aesthetics of natural stone. Ideal for high-end pools and decoration, they are the result of a rigorous selection process, ensuring that each proposal projects the beauty and sophistication needed for the most challenging projects. An invitation to experience the sensations of nature in its fullest expression.

Piedras del mundo

Greenland

The most extensive series of 'Piedras del mundo' features spectacular technical quality and color. The bricks use a broken gravel application, both in its glossy and matte versions, which provide a very interesting material richness and extraordinary value. The square version, suitable for combining with the two brick styles, has an anti-slip surface that grants it a Class 3 rating and is processed with digital gloss to mimic the mineral mica inlays.

Greenland

THE COLOR PALETTE

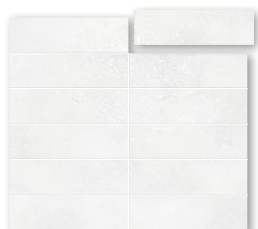

6 trending shades in fashion and decor that transport us to the beautiful landscapes of Greenland, with its waters, mountains, and the stunning northern lights, rich in hues and color.

Mijaran

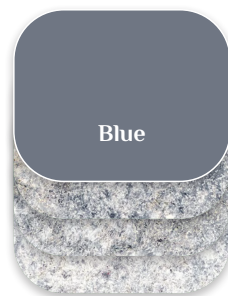

Inspired by the legendary Pèira de Mijaran, a megalithic granite monument, whose name in Aranese, Mitj Aran, places it in the center of the Arán Valley (Pyrenees), this series uses a blend of granules and coatings that mimic the granular and crystalline texture of granite, a magmatic rock whose name derives from the Latin 'granum'.

Mijaran

Bali

The use of Bali or Sukabumi stone is a well-established trend, especially in swimming pools. Our proposal stands out for its aesthetic and technical richness, capturing the natural beauty of this stone, formed by the accumulation of sediments and minerals. Its 25-face design reproduces the strong color variations and typical quartz inlays that emit bright flashes, enhancing its appeal.

Bali
